### Medical Guideline Disclaimer

Property of EmblemHealth. All rights reserved. The treating physician or primary care provider must submit to EmblemHealth the clinical evidence that the patient meets the criteria for the treatment or surgical procedure. Without this documentation and information, EmblemHealth will not be able to properly review the request for prior authorization. The clinical review criteria expressed below reflects how EmblemHealth determines whether certain services or supplies are medically necessary. EmblemHealth established the clinical review criteria based upon a review of currently available clinical information (including clinical outcome studies in the peer-reviewed published medical literature, regulatory status of the technology, evidence-based guidelines of public health and health research agencies, evidence-based guidelines and positions of leading national health professional organizations, views of physicians practicing in relevant clinical areas, and other relevant factors). EmblemHealth expressly reserves the right to revise these conclusions as clinical information changes, and welcomes further relevant information. Each benefit program defines which services are covered. The conclusion that a particular service or supply is medically necessary does not constitute a representation or warranty that this service or supply is covered and/or paid for by EmblemHealth, as some programs exclude coverage for services or supplies that EmblemHealth considers medically necessary. If there is a discrepancy between this guideline and a member's benefits program, the benefits program will govern. In addition, coverage may be mandated by applicable legal requirements of a state, the Federal Government or the Centers for Medicare & Medicaid Services (CMS) for Medicare and Medicaid members. All coding and web site links are accurate at time of publication. EmblemHealth Services Company LLC, ("EmblemHealth") has adopted the herein policy in providing management, administrative and other services to HIP Health Plan of New York, HIP Insurance Company of New York, Group Health Incorporated and GHI HMO Select, related to health benefit plans offered by these entities. All of the aforementioned entities are affiliated companies under common control of EmblemHealth Inc.

**Note: EmblemHealth considers home uterine activity monitoring (HUAM) for twin gestation, or as otherwise prescribed, to be medically necessary throughout the duration of the coronavirus 2019 (COVID-19) state of emergency. These additional indications will be discontinued eff. May 11, 2023 commensurate with the Federal emergency termination date.**

### Definitions

**Preterm labor (PTL) (also referred to as premature labor)** — labor onset from after 20 weeks gestation to less than 37.

Preterm labor risks include but are not limited to the following:

1. Previous preterm birth
2. Multiple gestation pregnancy (twins, triplets or more)
3. Presence of cervical or uterine abnormalities
4. Past history of preterm labor or preterm labor during current pregnancy.
5. Problems with the uterus, cervix or placenta.
6. Smoking cigarettes, drinking alcohol or using illicit drugs
7. Some infections, particularly of the amniotic fluid and lower genital tract
8. Some chronic conditions, such as high blood pressure and diabetes
9. Being underweight or obese before pregnancy
10. Stressful life events, such as the death of a loved one or domestic violence
11. Multiple miscarriages or abortions
12. Presence of bacterial vaginosis, trichomoniasis, or sexually transmitted infections
13. In vitro fertilization pregnancy
14. Short interpregnancy interval < 6 months

**Preterm birth** — birth prior to 37 weeks gestation.

**Home uterine activity monitor (HUAM)** — an electronic system consisting of a tocotransducer, recorder, modem and a data receive/process/display computer/monitor, which measures and then transmits uterine contraction data to a remote location for the purpose of PTL-detection.

### Guideline

Members receiving high risk prenatal care who have been evaluated by a perinatologist are eligible for HUAM coverage when any of the following criteria are met:

1. History or current PTL with documented cervical changes (dilation or effacement)
2. Multiple gestation pregnancy ( $\geq 2$ ) (Note: Covered for twins during COVID emergency)
3. Contractions not self-detectable secondary to physiologic condition (ie, neuromuscular, paralysis, etc)
4. Women with a positive fetal fibronectin test, gestational age is 20 weeks or greater and less than 36 weeks, and progressive cervical changes (with cervical length less than 2.5 cm documented by vaginal probe ultrasound) despite treatment with multiple tocolytics
5. Presence of risk factors that increase risk of preterm birth: placenta previa with hemorrhage; history of classical caesarean section or deep myomectomy with contractions/cervical change in index pregnancy, such that woman is not able to safely tolerate contractions
6. Incompetent cervix (as documented by need for cerclage or signs of cervical incompetence (funneling on valsalva, silent shortening)

### Revision History

Apr. 28, 2020	Added that EmblemHealth considers home uterine activity monitoring (HUAM) for twin gestation, or as otherwise prescribed, to be medically necessary throughout the duration of the coronavirus 2019 (COVID-19) state of emergency. Added clarification language that more definitively communicates the definition of high risk pregnancies.
