

## **Medical Policy:**

### **Torisel (temsirolimus)**

| POLICY NUMBER | LAST REVIEW     | ORIGIN DATE   |
|---------------|-----------------|---------------|
| MG.MM.PH.173  | January 2, 2024 | July 15, 2019 |

#### Medical Guideline Disclaimer Property of EmblemHealth. All rights reserved.

The treating physician or primary care provider must submit to EmblemHealth, or ConnectiCare, as applicable (hereinafter jointly referred to as "EmblemHealth"), the clinical evidence that the member meets the criteria for the treatment or surgical procedure. Without this documentation and information, EmblemHealth will not be able to properly review the request preauthorization or post-payment review. The clinical review criteria expressed below reflects how EmblemHealth determines whether certain services or supplies are medically necessary. This clinical policy is not intended to pre-empt the judgment of the reviewing medical director or dictate to health care providers how to practice medicine. Health care providers are expected to exercise their medical judgment in rendering appropriate care. Health care providers are expected to exercise their medical judgment in rendering appropriate care.

EmblemHealth established the clinical review criteria based upon a review of currently available clinical information (including clinical outcome studies in the peer reviewed published medical literature, regulatory status of the technology, evidence-based guidelines of public health and health research agencies, evidence-based guidelines and positions of leading national health professional organizations, views of physicians practicing in relevant clinical areas, and other relevant factors). EmblemHealth expressly reserves the right to revise these conclusions as clinical information changes and welcomes further relevant information. Each benefit program defines which services are covered. The conclusion that a particular service or supply is medically necessary does not constitute a representation or warranty that this service or supply is covered and/or paid for by EmblemHealth, as some programs exclude coverage for services or supplies that EmblemHealth considers medically necessary.

If there is a discrepancy between this guideline and a member's benefits program, the benefits program will govern. Identification of selected brand names of devices, tests and procedures in a medical coverage policy is for reference only and is not an endorsement of any one device, test or procedure over another. In addition, coverage may be mandated by applicable legal requirements of a state, the Federal Government or the Centers for Medicare & Medicaid Services (CMS) for Medicare and Medicaid members. All coding and web site links are accurate at time of publication.

EmblemHealth may also use tools developed by third parties, such as the MCG™ Care Guidelines, to assist us in administering health benefits. The MCG™ Care Guidelines are intended to be used in connection with the independent professional medical judgment of a qualified health care provider and do not constitute the practice of medicine or medical advice. EmblemHealth Services Company, LLC, has adopted this policy in providing management, administrative and other services to EmblemHealth Plan, Inc., EmblemHealth Insurance Company, EmblemHealth Services Company, LLC, and Health Insurance Plan of Greater New York (HIP) related to health benefit plans offered by these entities. ConnectiCare, an EmblemHealth company, has also adopted this policy. All of the aforementioned entities are affiliated companies under common control of EmblemHealth Inc.

#### **Definitions**

Torisel (temsirolimus) binds with specific and high affinity to immunophilin FKBP-12. This complex inhibits the mammalian target of rapamycin (mTOR) kinase, which leads to G1 phase cell cycle arrest and significant reductions in tumor size, as well as preventing the enhanced angiogenesis that is associated with sporadic renal cell carcinoma and loss of von Hippel Lindau function.

Torisel (temsirolimus) is FDA approved for the treatment of advanced renal cell carcinoma. Non-FDA labeled indications include: Endometrial Cancer and Soft Tissue Sarcoma

### **Length of Authorization**

Coverage will be provided for 12 months and may be renewed.

### **Dosing Limits [Medical Benefit]**

#### Max Units (per dose and over time):

25 billable units per 7 days

#### Guideline

#### **I. Initial Approval Criteria**

**Torisel** may be considered medically necessary when any of the following selection criteria is met:

- 1. Renal Cell Carcinoma (RCC). Approve if the patient meets ALL of the following criteria (A, B, C, and D):
  - A. Patient is  $\geq$  18 years of age; **AND**
  - B. Patient has relapsed, advanced, or metastatic disease; AND
  - C. Torisel will be used as a single-agent; AND
  - D. The medication is prescribed by or in consultation with an oncologist.

#### Other Uses with Supportive Evidence

- 2. Endometrial Carcinoma. Approve if the patient meets ALL of the following criteria (A, B, C, and D):
  - A. Patient is ≥ 18 years of age; **AND**
  - B. Patient has recurrent, metastatic, or high-risk disease; AND
  - C. Torisel will be used as a single-agent; AND
  - D. Patient has **ONE** of the following (i or ii):
    - i. Endometrial carcinoma; OR
    - ii. Uterine perivascular epithelioid cell tumor (PEComa); AND
  - E. The medication is prescribed by or in consultation with an oncologist.
- **3. Soft Tissue Sarcoma**. Approve if the patient meets ALL of the following criteria (A, B, C, and D):
  - A. Patient is ≥ 18 years of age; AND
  - B. Patient has **ONE** of the following (i, ii, iii, or iv):
    - i. Perivascular epithelioid cell tumors (PEComas); OR
    - ii. Recurrent lymphangioleiomyomatosis; OR
    - iii. Recurrent angiomyolipoma; OR
    - iv. Non-pleomorphic rhabdomyosarcoma; AND
  - C. Patient meets **ONE** of the following (i or ii):
    - i. Torisel will be used as a single-agent; **OR**
    - ii. Torisel will be used in combination with cyclophosphamide and vinorelbine: AND
  - D. The medication is prescribed by or in consultation with an oncologist.

#### **Limitations/Exclusions**

Torisel is not considered medically necessary for when any of the following selection criteria is met:

- 1. The member has moderate to severe liver disease, bilirubin greater than 1.5 x ULN.
- 2. Torisel (temsirolimus) is being used without pretreatment medications (i.e. diphenhydramine).
- 3. Member has disease progression while taking Torisel (temsirolimus).
- 4. Torisel (temsirolimus) is being used concurrently with other chemotherapy.
- 5. Dosing exceeds single dose limit of Torisel (temsirolimus) 25 mg.
- 6. Indications not supported by CMS recognized compendia or acceptable peer reviewed literature may be deemed as not approvable and therefore not reimbursable.

#### II. Renewal Criteria

Patient continues to meet criteria in INITIAL APPROVAL CRITERIA.

### Dosage/Administration

| Indication                     | Dose |   |
|--------------------------------|------|---|
| Renal cell carcinoma, Advanced | _    | 25mg IV infused over 30 to 60 minutes once weekly until disease progression or unacceptable toxicity; premedicate with diphenhydramine 25 to 50mg IV 30 |
|                                |      | minutes prior to each dose  |

# **Applicable Procedure Codes**

| Code  | Description   |
|-------|---|
| J9330 | Injection, temsirolimus, 1 mg, 1 billable unit = 1 mg |

# **Applicable NDCs**

| Code          | Description                |
|---------------|----------------------------|
| 00008-1179-xx | Torisel 25 mg/ml injection |

## **ICD-10 Diagnoses**

| Code   | Description   |
|--------|---|
| C48.0  | Malignant neoplasm of retroperitoneum   |
| C48.1  | Malignant neoplasm of specified parts of peritoneum                                       |
| C48.2  | Malignant neoplasm of peritoneum, unspecified   |
| C48.8  | Malignant neoplasm of overlapping sites of retroperitoneum and peritoneum                 |
| C49.0  | Malignant neoplasm of connective and soft tissue of head, face and neck                   |
| C49.10 | Malignant neoplasm of connective and soft tissue of unspecified upper limb, including     |
| C49.11 | Malignant neoplasm of connective and soft tissue of right upper limb, including shoulder  |
| C49.12 | Malignant neoplasm of connective and soft tissue of left upper limb, including shoulder   |
| C49.20 | Malignant neoplasm of connective and soft tissue of unspecified lower limb, including hip |
| C49.21 | Malignant neoplasm of connective and soft tissue of right lower limb, including hip       |
| C49.22 | Malignant neoplasm of connective and soft tissue of left lower limb, including hip        |
| C49.3  | Malignant neoplasm of connective and soft tissue of thorax                                |
| C49.4  | Malignant neoplasm of connective and soft tissue of abdomen                               |
| C49.5  | Malignant neoplasm of connective and soft tissue of pelvis                                |
| C49.6  | Malignant neoplasm of connective and soft tissue of trunk, unspecified                    |
| C49.8  | Malignant neoplasm of overlapping sites of connective and soft tissue                     |
| C49.9  | Malignant neoplasm of connective and soft tissue, unspecified                             |
| C54.0  | Malignant neoplasm of isthmus uteri   |
| C54.1  | Malignant neoplasm of endometrium   |
| C54.2  | Malignant neoplasm of myometrium  |
| C54.3  | Malignant neoplasm of fundus uteri  |
| C54.8  | Malignant neoplasm of overlapping sites of corpus uteri                                   |
| C54.9  | Malignant neoplasm of corpus uteri, unspecified   |

| C55     | Malignant neoplasm of uterus, part unspecified                  |  |
|---------|---|--|
| C64.1   | Malignant neoplasm of right kidney, except renal pelvis         |  |
| C64.2   | Malignant neoplasm of left kidney, except renal pelvis          |  |
| C64.9   | Malignant neoplasm of unspecified kidney, except renal pelvis   |  |
| C65.1   | Malignant neoplasm of right renal pelvis                        |  |
| C65.2   | Malignant neoplasm of left renal pelvis                         |  |
| C65.9   | Malignant neoplasm of unspecified renal pelvis                  |  |
| D49.2   | Neoplasm of unspecified behavior of bone, soft tissue, and skin |  |
| Z85.831 | Personal history of malignant neoplasm of soft tissue           |  |

# **Revision History**

| Company(ies)   | DATE      | REVISION   |
|----------------|-----------|--|
| EmblemHealth & | 1/2/2024  | Annual Review:   |
| ConnectiCare   |           | Initial Criteria: Endometrial Carcinoma: Added requirement that the patient    |
|                |           | has either endometrial carcinoma or uterine perivascular epithelioid cell      |
|                |           | tumor (PEComa).  |
| EmblemHealth & | 4/17/2023 | Annual Revision:   |
| ConnectiCare   |           | Increased length of authorization from 6 months to 12 months                   |
|                |           | Initial Criteria: Renal Cell Carcinoma- Removed:                               |
|                |           | A.First-line or subsequent therapy as a single agent for relapsed or medically |
|                |           | unresectable stage IV clear cell histology disease AND with > 3 high risk      |
|                |           | factors:   |
|                |           | i.Serum lactate dehydrogenase level (LDH) >1.5 times the upper limit of        |
|                |           | normal   |
|                |           | ii.Hemoglobin level below normal   |
|                |           | iii.Corrected serum calcium >10milligrams/deciliter (mg/dL)                    |
|                |           | iv.Interval of less than a year from initial diagnosis                         |
|                |           | v.Karnovsky performance status of 60 or 70 (for ECOG conversion status,        |
|                |           | please see Appendix A).  |
|                |           | vi.2 or greater metastatic sites.  |
|                |           | OR   |
|                |           | First line or subsequent therapy as a single agent for relapsed or medically   |
|                |           | unresectable stage IV disease with non-clear cell histology                    |
|                |           | Added:   |
|                |           | A)Patient is ≥ 18 years of age; AND  |
|                |           | B)Patient has relapsed, advanced, or metastatic disease; AND                   |
|                |           | C)Torisel will be used as a single-agent; AND                                  |
|                |           | D)The medication is prescribed by or in consultation with an oncologist.       |
|                |           | Added Other uses with supportive evidence:                                     |
|                |           | Other Uses with Supportive Evidence  |
|                |           | 2.Endometrial Carcinoma. Approve for 1 year if the patient meets ALL of the    |
|                |           | following criteria (A, B, C, and D):   |
|                |           | A)Patient is ≥ 18 years of age; AND  |
|                |           | B)Patient has recurrent, metastatic, or high-risk disease; AND                 |

|                |           | C\Textsel will be used as a single agent. AND                                 |
|----------------|-----------|---|
|                |           | C)Torisel will be used as a single-agent; AND                                 |
|                |           | D)The medication is prescribed by or in consultation with an oncologist.      |
|                |           | Dosing. Each individual dose must not exceed 25 mg administered by            |
|                |           | intravenous infusion no more frequently than once a week.                     |
|                |           | 3.Soft Tissue Sarcoma. Approve for 1 year if the patient meets ALL of the     |
|                |           | following criteria (A, B, C, and D):  |
|                |           | A)Patient is ≥ 18 years of age; AND   |
|                |           | B)Patient has one of the following (i, ii, iii, or iv):                       |
|                |           | i.Perivascular epithelioid cell tumors (PEComas); OR                          |
|                |           | ii.Recurrent lymphangioleiomyomatosis; OR                                     |
|                |           | iii.Recurrent angiomyolipoma; OR  |
|                |           | iv.Non-pleomorphic rhabdomyosarcoma; AND                                      |
|                |           | C)Patient meets one of the following (i or ii):                               |
|                |           | i.Torisel will be used as a single-agent; OR                                  |
|                |           | ii.Torisel will be used in combination with cyclophosphamide and vinorelbine: |
|                |           | AND   |
|                |           | D)The medication is prescribed by or in consultation with an oncologist.      |
|                |           | Removed Z80.49, added C48.0-C49.6 codes                                       |
| EmblemHealth & | 1/17/2023 | Transfer to New Template  |
